***Claim Rejections - 35 USC § 103***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Helleu (781,287) in view of Basso (5,413,348). Regarding amended claim 1, note the rejections of claims 1 and 2 set forth in the first Office Action.

Regarding claims 3-6, note the rejections set forth in the first Office Action.

Regarding claim 7, note the rejections of claims 7 and 8 set forth in the first Office Action.

Regarding claims 9 and 10, note the rejections set forth in the first Office Action.

***Response to Arguments***

3. Applicant's arguments have been fully considered but are not deemed to be persuasive. The applicant contends that the reference to Helleu requires a special head section (2) to hold the ball whereas the current invention allows the golfer to utilize a standard tee. Further, the applicant contends that neither Basso nor Helleu teach a crimped sleeve. The applicant argues that Basso provides a flexible corrugation in the tee member not in the ground engaging pointed portion. Further, the applicant states that the walls of reduced diameter of Basso do not teach a crimp as claimed.

However, this is not persuasive as the instant claims fail to preclude the use of the tee as taught by Helleu. Instant claims 1, 7 and 8 merely require a golf tee member having a stem portion and a circular head portion. Clearly, the ball supporting member (2) teaches this structure by including a stem portion (4). The applicant's argument that the section of reduced

Art Unit: 3711

diameter taught by Basso is in the tee section and not the ground engaging portion is not persuasive either as the rejection is over the combination of Helleu in view of Basso. Helleu provides an elongated sleeve (5) constructed of flexible material that is supposed to bend upon impacts (note Figure 1). The reference to Basso is relied upon merely for its teaching that it is old and well known in the art of golf tees to provide a crimped section along the length in order to facilitate bending at a particular point. It would have been obvious to one of ordinary skill in the art to form the sleeve portion of Helleu with a crimped portion as taught by Basso in order to facilitate deformation of the sleeve about a particular point.

Regarding the applicant's argument that the section of reduced diameter of Basso does not comprise a crimped portion, attention is directed to the attached dictionary definition for "crimp". Here, the definition merely requires something that is bent or wavy or pinched or pressed together. Clearly, the section of reduced diameter (a-a) of Basso fulfills this definition.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
